

Tell me your story!

TADEP Communications project

Photo: (Featured below, but email as an attachment instead when submitting)

Caption: At the NARI research station in Aiyura, Eastern Highlands, sweet potato researcher Myla Deros checks on the clean kaukau (sweet potato) vines growing in the screen house. NARI is providing FPDA sweet potato vines as part of the ACIAR sweet potato project. The project is one of five under the TADEP initiative supported by ACIAR and DFAT.

Photographer: Conor Ashleigh

Who: (is the audience?)	Australian public, researchers, NARI, FPDA
When: (date)	Thursday 1 March 2018
Where: (location)	Aiyura, Eastern Highlands
What: (thematic)	<p>Highlight which of the follow TADEP goals it correlates to:</p> <p>Private sector-led development</p> <p>Agricultural productivity, quality and value</p> <p>Access to markets and value chains</p> <p>Gender equity and women’s empowerment</p> <p>Individual and institutional capacity building</p>
Why/How: (is it interesting?)	Collaboration between NARI and FPDA to provide pathogen-tested (‘clean’) sweetpotato planting materials for the project.
Who: (is the character?)	Myla Deros, NARI Sweetpotato Researcher
What medium: (photo story, film, text story, etc)	Social media post by ACIAR, TADEP Update
